

# Easy-Stringer Directions for Use

## Unwinding

1. Stake the end of the string into the ground.
  2. Hold onto the plastic rod underneath the spool and walk down the painting path with the Easy-Stringer horizontal to the ground.
- 

## Hand Winding

1. Keep the end of the string staked.
  2. With one hand grab the plastic rod, and with the other hand hold onto the handle on the spool.
  3. While holding the Easy-Stringer horizontal to the ground, simultaneously turn the spool and walk towards the stake.
- 

## Drill Powered Winding

1. Remove all stakes from string.
2. Place bottom end of Easy-Stringer on the ground.
3. Put provided glove on non-dominant hand.
4. With provided drill bit chucked into drill, use dominant hand to place the bit over the top nut on the Easy-Stringer.
5. Slowly start the drill while applying a small amount of tension to string with gloved hand.
6. Increase speed to controllable level while distributing string evenly on spool with gloved hand.
  - a. If the string is guided off of spool, immediately stop the drill and re-distribute string onto spool before resuming.
7. Pay attention to the amount of string still winded out and slow down when the end of the string is near.
